

YCS D Concussion & Return to Play Information

(Attach Second Page of This Form to VHSL Physical Form)

In order for students to participate in any extracurricular physical activity, each student-athlete and the student-athlete's parent or guardian shall review, on an annual basis, information on concussions provided by the local school division. After having reviewed materials describing the short- and long-term health effects of concussions, each student-athlete and the student-athlete's parent or guardian shall sign a statement acknowledging receipt of such information. *Please see the YCS D Athletic Handbook for detailed concussion information, located on the school athletics web page, and review this concussion education video from CHKD. <https://safeYouTube.net/w/n5rX>*

I. Definition of Concussion

A brain injury that is characterized by an onset of impairment of cognitive and /or physical functioning, and is caused by a blow to the head, face or neck, or a blow to the body that causes a sudden jarring of the head. A concussion can occur with or without a loss of consciousness, and proper management is essential to the immediate safety and long-term future of the injured individual.

II. Signs and Symptoms

Signs observed by parents or guardians

- | | |
|---|--|
| * appears dazed or stunned | * is confused about assignment or position |
| * forgets an instruction | * is unsure of game, score, or opponent |
| * moves clumsily | * answers questions slowly |
| * loses consciousness (even briefly) | * shows behavior or personality changes |
| * can't recall events <i>prior</i> to hit or fall | * can't recall events <i>after</i> hit or fall |

Symptoms reported by athlete

- | | |
|----------------------------------|--|
| * headache or "pressure" in head | * nausea or vomiting |
| * balance problems or dizziness | * double or blurry vision |
| * sensitivity to light | * sensitivity to noise |
| * confusion | * feeling sluggish, hazy, foggy, or groggy |
| * does not "feel right" | * concentration or memory problems |

III. Return to Learn

Many of the signs and symptoms associated with a concussion can affect a student's ability to participate in normal academic activities. With different rates of recovery, students may need modifications in their academic setting. Adjustments could include cognitive and physical rest with no school, part-time school, or full day school with minimal instructional modifications and/or accommodations.

IV. Return to Play Progression

If an athlete is suspected of having incurred a concussion during practice or play, this procedure will be followed:

1. removal from activity
2. notification of parent/guardian regarding the incident
3. the student-athlete must bring written clearance from his/or licensed health care provider
4. begin a 6-stage return to play progression per school's licensed athletic trainer / coach / nurse, return to full participation after completing steps 1-5. (See Athletic Handbook for specific details)

It's better to miss one game than the whole season. For more information on concussions, visit: www.cdc.gov/Concussions

YCSO Concussion & Return to Play Information Acknowledgement

(Attach to VHSL Physical Form)

In order for students to participate in any extracurricular physical activity, each student-athlete and the student-athlete's parent or guardian shall review, on an annual basis, information on concussions provided by the local school division. After having reviewed materials describing the short- and long-term health effects of concussions, each student-athlete and the student-athlete's parent or guardian shall sign a statement acknowledging receipt of such information. This information includes: The YCSO Concussion and Return to Play Information Form, the Middle/High School Athletic Handbook (Concussion Information), and the CHKD Concussion Education Video.

V. Acknowledgement by Parents/Guardians and Student-Athletes

I have reviewed the YCSO information concerning concussion and return to play procedures.

_____	_____	_____
